We do not know where Bianca comes from. Perhaps she comes from a Moon pebble, an ocean foam, or from a butter curl. Perhaps she comes from a crumpled sheet of paper drifted off an artist's table.

Bianca peeps through the world out of her cocoon with two huge, transparent eyes that transform everything into something else, dancing and changing as if inside a kaleidoscope. Her white world hides so many little secrets...

Bianca's Rainbow is a journey to discover shapes and colours, geometries and

refractions, to find out that white is not the absence of colours, but the presence of all colours together, and that a crumpled sheet of paper, if we look at it better, can actually be a wonderful origami.

Bianca's Rainbow is a show for everyone, with a privileged focus on the young ones. It is composed by “tableau”, each of which is dedicated to a colour: white, blue, yellow, red. In each scene Bianca plays with emotions and different qualities of movements that the color awakens in her body.

Together with Bianca, we will discover that everyone has many color shades inside, the trick is to let them emerge!
